

BACKUP PUMPS

Why Pro Series Backup Pumps?

Proven Reliability

- Decades preventing basements from flooding
- Features the most complete monitoring alarm system and high-capacity pumps
- Designed to be a major appliance with years of dependable service
- 100% factory tested

Redundancy

- Dual float switches on all backup systems provide twice the protection
- Combination systems have four total float switches to ensure the pumps run when needed
- Backup pumps can be installed separately or combined with a "Y" connector to meet any installation requirement

Monitoring Features

- Exclusive monitoring and alarm features provide security and peace of mind for homeowners and contractors
- User-friendly audible and visual alarms notify the user that maintenance is needed, ensuring operation when needed

Pro Series Pumps CONNECT

- Remote notification available using built-in USB data port or remote terminal (Model PHCC-1850, PHCC-2400, PS-C22 & PS-C33) allowing for emergency or maintenance alerts via text, email, in-app notification, home security system, or other dry-contact device.

PHCC-2400

- 13 amp charger strength
 - Caged Dual Float Switch provides added protection
 - System pumps intermittently for days
 - Switches automatically to battery power when AC power fails
 - Pumps automatically when water volume exceeds the capacity of the main AC pump
 - Automatically tests the pump weekly
 - Alarms when pump is clogged
 - Designed for use with wet-cell or Maintenance-free Batteries*
 - Can accommodate multiple standby batteries to extend the run time
 - Detects irregularities, sounds an alarm, and pinpoints problems and solutions on the Control Panel
 - The alarm can be silenced during a power outage
- *Battery not included
